

CASE STUDY

SERVICE PROVIDED:

Cellular Account Analysis
Monthly Cellular Management

AUDIT RESULTS:

Previous Monthly Spend
\$2,304.42 with 36 devices

Current Monthly Spend
\$1,086.90 with 32 devices

SAVINGS:

Monthly Cost Reduction
\$1,217.52

THE CHALLENGE

The client was referred to *Verify!* by another client, with the intention to reduce the expense of their business cellular account.

Verify!'s focus during the comprehensive analysis was to work within their current contract to find cost saving opportunities while also optimizing their services.

THE SOLUTION

Verify! provided the client with a full inventory of their cellular account, including a service utilization report. The detailed analysis included several cost saving recommendations, all allowing the client to maintain their current wireless provider.

The client was able to make well-informed decisions regarding which cost savings and service optimizing changes would best support the goals of their business.

The client-approved recommendations were fully implemented by *Verify!*, and all cost reductions were verified on their next wireless invoice. All savings fell directly to the client's bottom line.

THE ADDED VALUES

The client chose to convert from a one-time analysis to an ongoing client in order to gain:
Increased internal operational efficiency | Device ordering and management
Monthly wireless invoice review | Proactive notifications of cost saving opportunities
